

MATH 141 HW INSTRUCTIONS:

(KUNIYUKI)

- You do **not** have to do any problems indicated as “**ADDITIONAL PROBLEMS.**”
- **Write your name and Math 141** in the upper right-hand corner of your first sheet (or on a cover sheet). Use your own paper. If you turn in more than one packet, put your name on each one.
- **Do not turn in a thick, bulky binder!** I have to carry around a lot of these HWs, and the HWs might be **returned much later.**
- **Clearly separate sections!**
- The sections are **keyed to my online notes**, not to a textbook.
- **Show work** where appropriate, and use “good form and procedure,” as in class!
- **Each HW assignment is due at the corresponding exam.** Expect late HW to be penalized.
- Remember that you learn by **thinking** about problems, not by just going straight to the answers!
- **You do not have to rewrite the questions**, though copy down expressions, equations, etc. that you are “working on.” This will help you when you study.
- You may want to (neatly) **write comments and mark problems** you have trouble with. The HW is a tool to help you!
- The HW will be scanned for completeness and for honest effort. It will not be graded rigorously. Again, the HW is a tool to help you! It may inspire **exam problems.** Also, ...
- Feel free to **ask me questions about the HW (or anything else)** – in office hours, by email (or phone), or during the in-class HW sessions we will have; I usually take questions during part of the class session before an exam. **Tell me your thought process!** Don’t just give me a list of numbers.
- Feel free to email / tell me about **corrections and suggestions.** I’m always trying to improve these materials.
