MATH 119 - RULES FOR THE TEST (QUIZ #1)

• NOTE: The **old exams** on my website (near the bottom) will be very helpful, but your exams will have both similarities and differences. The old solutions only really help you if you look at them **after** you try the old test!

§ For the test, bring:
- Homework (HW), unless you email it
- Scientific calculator
- Pencil / pen (maybe not blue - I may grade in blue!) / eraser

§ Turn in the HW
- Staple your packet(s) with your name.
- No binders; it may be a while until you get them back.
- You can turn in or email the HW soon **after** the test, but **don't forget** about it!

§ A **formula sheet** will be provided, similar to the one on my website.

§ I'll hand out scratch paper.
- The back of a test may be used as scratch; it depends on the # of pages.
- Turn in **all** scratch paper with your test.
- Staple what you want graded.
- Neater work is more likely to be graded.
- On the main test, write "SEE SCRATCH" (or the like) on a problem you are continuing on scratch paper.

§ If you take a bathroom break (try to avoid during the test):
- Give me your cell phone.
- I expect to photograph your test.

§ If you have a question during the test, raise your hand or approach me.

§ When you're done with the test, give the **test and scratch paper** to me.
(**Also the HW** if you haven't submitted it!)
- Return to your desk or exit quietly. You may work on your HW.
- Do not discuss the test. People may come in late.
- We may discuss solutions after the test.

§ I expect to allot 1 hour and 20 minutes for each exam (including the Final, even though it is worth 20% more than a quiz).

MATH 119 - HELP FOR THE TEST

§ **Office hours** will be on campus on the test day, 4:30-5:45pm, in MS-215P on the second floor. It's three rights from the elevator. Beyond the glass doors, go either left and then right or right and then left. I'm at the other end of the "triangle" – across from the big glass study area.

§ The **old exam** on my website will be helpful … but it won't be enough. Your exam will have similarities and differences. Try to practice the old exam on your own and DO NOT look at the solutions until afterwards. Students learn nothing if the solutions are too close to them during their practice run.
